

brandon high school

# Brandon High School

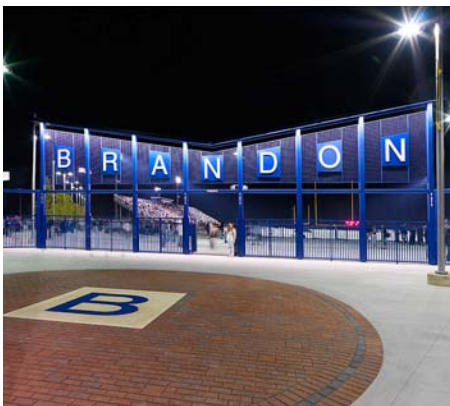

Brandon School District

Ortonville, Michigan  
Completed in 2008  
38,000 sf new / 300,000 sf total  
\$24,500,000

This campus has been incomplete since the existing building was constructed in the 1970's. A recent bond issue called for the athletic fields to move from their location at the former high school to the existing school.

The new "activities complex", designed around the existing soccer and softball fields, includes a 4,000-seat stadium with turf field, synthetic track, press box, concessions, ticket booth, restrooms, track-and-field areas, and a new 5,600 s.f. locker room / storage building.

The new cafeteria addition was designed to be divided into three separate rooms for multiple events. The cafeteria seating extends outside to provide seating for warmer months as well as pre-event function seating for the activities complex. Additional interior changes were made to the theater seating, school store, business classroom, computer lab, weight room, band room, choir room, and science labs. The district's Central Offices, housed at the high school, were also renewed.
