# College Center

St. Clair County Community College

Port Huron, Michigan  
Completed in 2006  
46,670 sf  
\$5,500,000

## 2007 Project of Distinction

*School Planning & Mgmt. Education Design Showcase*

The goal of this project was to renovate, update and expand the College's engineering, math and lecture spaces, as well as establish the media center as a centralized location for support and instruction. College Center renovations included the remodeled and expanded Learning Resources Center (library), new classrooms and faculty offices.

The main reading areas and book stacks are located inside the addition. An abundance of natural light provides a comfortable study environment. The existing building was modified to house ancillary library spaces, conference space and student tutoring and testing areas. Advanced multi-media and technology systems, including direct and wireless Internet access, were added.

Additionally, the outdoor plaza leading to the building's main entry was completely remodeled and landscaped.
