Shelby Macomb Medical Mall

Shelby Township, Michigan
May 2009
165,000 sf
\$26,000,000

Shelby Macomb Medical Mall is a 4-story medical office building owned by the medical practices that are also building tenants. Along with the design of the core and shell, French Associates also provided interior design services to each tenant through a showcase in which tenants chose from a series of options. Medical practices include internal medicine, associated orthopedics, cardiology, pulmonary critical care, podiatry, dentistry, physiatry and oncology.

Unique attributes for this building include extensive use of marble and high-end interior finishes, millwork, and wall coverings. No details were overlooked, down to ornate, hand-painted railings and limestone details.

The Shelby Macomb Medical Mall is a first-class facility conceived, designed, and constructed with the patient in mind.

The Shelby Macomb Medical Mall features a central atrium, made of marble, wood and limestone materials. The atrium houses small shops, such as a pharmacy and coffee shop, to serve visitors to the building.
